

KETT WIESEL | TOUR

Trike and travel!

The triking world, of course, has its own three Rs: relaxed, road-worthy and ready. Laid back, cradled in the mesh seat 46 centimeters above C-level (as in concrete), the horizon becomes your personal panorama and your neck has never felt so good on wheels. Taking a break or just sightseeing? Kick back and relax without ever leaving your seat.

Exploring distant lands and redefining what it means to travel – the KettWiesel tour lets you do both. With 27 gears straight from the Tiagra racing series, you'll always be able to find the perfect one for relaxed gliding on every stretch of road. A flick of the wrist is all it takes. Leave the headwind to the bikers.

Technical Data

Dimensions: like KettWiesel Allround
Frame/Fork: 7046/7005 aluminum
Front boom: 6061 aluminum

Colors: Matt black / powder coated, other colors available upon request

Because speed is always fun, even on tour: The Avid mechanical disc brakes keep the Tour on course down every downhill stretch – even with a heavy load. The optional luggage system is the perfect way to carry your travel necessities: The large Hase Luggage Bag holds a whopping 50 liters of luggage and can be hung securely

on the seat in a position that ensures a low center of gravity for stable handling. And the Lowrider bags offer even more capacity with excellent handling properties. The high-tech lighting system for the trip comes with a SON hub dynamo and with standlight function. It's clear: Some pretty bright ideas went into this system.
