New Accessory for HASE BIKES PINO and Trikes: Adjustable Seat Cover for Ergonomic Cycling

Well padded, adjustable at six sites, and extremely back-friendly: The Vario Comfort seat cover makes recumbent cycling even more enjoyable.

The seat of a HASE BIKES recumbent trike – and the front seat of a PINO semi-recumbent tandem – offers riders a much more comfortable and back-friendly sitting position than a conventional bicycle saddle. However, some riders, particularly people with physical impairments or disabilities, can still experience back discomfort. This is why HASE BIKES has decided to take the comfort up a notch: “Our new Vario Comfort seat cover advances the comfort and adjustability of our standard seat to the next level,” said designer Paulo Mesquita, who played a key role in the design process. “It not only has an extended seat surface and three centimeters (1¼ inch) of padding but can also be adjusted at six different sites.”

Stability and support through adjustable padding

The Vario principle is both simple and ingenious. Mesquita: “The seat cover can be individually adjusted to the rider’s shoulders, back, and pelvis. The section that supports the spine can be moved up or down. This makes it possible to achieve optimal seat ergonomics for tall, short, narrow, and wide riders.”

Wedge cushions offer even better adjustment

In addition, the small wedge cushions that are available for use with the Vario Comfort seat cover can be attached at six different sites. Paulo Mesquita: "The cushions are secured with velcro. And it's also possible to use two together, one over the other, to make the respective area even narrower."

Fits to (almost) all trikes and the PINO

The new Vario Comfort seat cover can be easily and securely fastened to the seat frame using velcro straps. "This means that you can use it with your old bike or trike just as easily as with a brand-new one. The seat cover fits to the recumbent seat frames of the HASE BIKES models KETTWIESEL, LEPUS, and TRIX, and of course to the front seat of the PINO," explained Mesquita. The only models that can't use the cover are the TRIGO and TRETTS, because their seat frames have a different design.

Available from October 2022

About HASE BIKES:

Marec Hase, engineer, owner and managing director of HASE BIKES, has been developing extraordinary bikes and trikes for the past 30 years. The successes of the now 100-member team have earned numerous design awards and attracted a growing community of passionate HASE bikers from (practically) every corner of the world. The trikes and bikes from HASE BIKES are popular for recreational sports, bike tours and family routines, as well as in adaptive cycling. Their innovative construction, high-quality engineering and multi-award-winning designs make them attractive for all riders, regardless of age or physical ability. Thanks to the wide spectrum of accessories for various uses, HASE BIKES can be individually adapted to the (special) needs of any rider, so that words like "abled" and "disabled" lose their meaning. If you'd like to learn more about what makes the bikes, trikes and people from HASE BIKES so special, then visit us at www.hasebikes.com.
