FREEDOM ON THREE WHEELS: DELTA TRIKES.

HASE BIKES only builds delta trikes. We're convinced that it's the best trike design. Deltas have two wheels in back, and one wheel in front that does the steering. The recumbent seat is positioned in the rear third of the trike between the front and rear axles. This design not only ensures exceptional stability and good traction, but also offers many other advantages:

UPRIGHT PARKING

- > Upright parking allowed! A delta trike can be parked with its front wheel in the air, which saves space indoors and is a real eye-catcher outdoors.

SMALL TURNING RADIUS

- > Thanks to its geometry, a delta trike can turn on a dime – which can also be helpful when parking.

GET INTO THE SEAT COMFORTABLY

- > When your delta trike is parked on level ground, you can sit down easily on the seat between the rear wheels.

TWO-WHEEL DRIVE? NO PROBLEM!

- > With a delta trike, most of the weight rests on the rear axle, which translates into good traction for the rear wheels. If you add a Differential, which transfers the power to both rear wheels, it's even easier to power up steep hills – regardless of the road surface.
- > Optimal uphill option: a Shimano Steps mid-motor!
